

Interpretive Trails

Mornington Wilderness Camp

Annie Creek Riparian Habitat Trail

A 1.6 km round trip, the Annie Creek trail meanders through lush creek-side habitat. Many of the plants and animals along the trail are only found in this specialised habitat. Walk this trail in the early morning or late afternoon when wildlife is most active.

Duration: 1 hour.

Difficulty: Easy

Savanna Woodland Habitat Trail

The Savanna Woodland trail starts 50 m north of the Annie Creek Trail and is 1.6 km long, with some shade. Following the base of an escarpment, this trail explores savanna woodland ecosystems, the role of fire and how to manage them for biodiversity.

Duration: 1 hour

Difficulty: Easy

Termite Trail

The Termite Trail is located in the Spinifex grasslands on the road to Sir John Gorge, 7 km from camp. Follow the trail to learn all about these fascinating insects and their vital role in the savanna ecosystems of northern Australia.

Duration: 45 minutes

Difficulty: Easy

Evening Slideshow

End your day with AWC staff at the big screen near the restaurant for an evening slideshow. Providing an overview of Mornington and an insight into the work of AWC, this is a great chance to have your questions answered about research, conservation, land management and science. Check times at reception.

Self-guided Tours

Mornington Wilderness Camp

Dimond Gorge Canoe

The impressive Dimond Gorge is one of the most spectacular gorges in the Kimberley. Take a packed lunch and spend a whole day exploring 2 km of the Fitzroy River. Collect your map, life jackets and paddles from reception before departing.

\$70 canoe hire (2 or 3 person Canadian canoe).

Sir John Gorge Canoe

Book exclusive access to the series of 3 canoes set along 4 km of Sir John Gorge. This peaceful, ancient waterway is a wonderful place to spend a day. Collect your map, life jackets and paddles from reception before departing.

Includes hamper lunch and canoes. \$185 per 2 people.

Cadjeput & Bluebush Waterholes

Both of these waterholes are found on the Fitzroy River and provide ideal shady locations for relaxing, birdwatching, swimming and soaking up the Kimberley atmosphere.

Stop in on your way home from Sir John or Dimond Gorge, or set yourself up on the riverbank for a whole day.

4WD Habitat Trails

Comprehensive habitat trail notes guide you through the variety of habitats found between camp and Sir John Gorge or Dimond Gorge. Learn why this stunning landscape is important for Australian wildlife. Habitat trail notes are available from reception for a \$10 deposit.

Duration: 40 minutes to Sir John Gorge (14 km) and 1 hour to Dimond Gorge (25 km).
